

SLIDE VALERIANA ECO

SLIDE VALERIANA ECO is an electrical machine designed for the valerian harvest. It has an automated system to load and unload the product into and out of the bins, managed by a PLC and Hortech microprocessor. It reaches a speed of between 0 and 10 km/h with 2 gears: working speed from 0 to 5 km/h and travel speed from 0 to 10 km/h. It is equipped with three-phase brushless asynchronous engines that eliminate any need for maintenance; it also has new 48 V batteries with a power of 450 A/h, lasting up to 16 hours, with built-in battery charger. The innovative charging system guarantees high performance, with the possibility of recharging the battery at any time regardless of the % of charge still left. Slide valeriana Eco is a 4x4 machine with differential lock for full drive and electronic cutting sensors managed by a Hortech microprocessor with electrical actuators. It is fitted with a new comb conveyor system, positioned over the rack, to accompany the product better. Moreover, steering is wholly electric with a wide radius of 75°.
